

C3 TRAINING BATTLE CARD

C3 Biosecurity Platform:

We're helping businesses reopen safely with our platform, leveraging AI, ML, IOT, & Biometric facial scan thermal technologies.

We help enterprise firms protect their employees, reduce workplace anxiety, and limit pandemic breach of their most critical, internal assets.

Our solutions come ready built to Accurately scan for feverish temperatures, Mask detection, contact tracing capabilities, Multitenancy, VMS, secure door access integration and monitoring, sanitization schedules, patron counting, and a slew of other features ready built for the POST COVID timeframe.

Our solutions can be plug & play and are pretty simple to deploy and manage. We have delivered these solutions to the enterprise in multiple sectors - Schools, Hospitals, Labs, Hotels, Arenas, Theatres, Comm buildings, Buses, etc. Phillip Morris, Amgen, Plaza, GH, Motion Labs, etc.

Questions to ask:

- What are your reopening plans for your staff?
- Do you have employees, vendors, and clients coming into your facilities?
- Any compliance or HR reqs now implemented due to the pandemic?
- Any areas that you're struggling to meet or looking to enhance? Whether its a healthcheck questionnaire, temp checking. etc?
- Any specific technologies youre looking at to help cope with the transitions to WFH? Onsite or remote for that matter..

FAQs:

- We're helping businesses reopen and bring their employees back safely.
- Our solution allows for enterprises to protect their employees and get back into the offices.
- C3 Helps manage visitors and enhance physical security through the biometric facial recognition and visitor management system.
- C3 has a public facing profile where employees can view the Sanitization of the facilities, vaccinations, testing, and overall community safety protocols @ work.

C3 Access Pod Bullet points:

- Contactless Thermal, Temp, and facial recognition scanner to check for CV symptoms
- Accurate Human skin temperature scan within (1-2 secs)
- Thermal kiosks and IP surveillance camera options available
- Multiple mount options - Kiosk, Desktop, Wall mount..
- Contact Tracing options according to CDC guidelines
- Data ingestion & Employee Profile recognition
- Door access Control Integration with existing systems - Trigger actionable outcomes (Email / Text notifications)
- (2) week lead time on equipment
- Consultation to design optimal architecture & demo solutions

C3 Platform:

- Human Core TempDetection
- Biometric AI FacialRecognition
- Contact Tracing
- Mask Detection
- Contact Tracing
- Clock-in / Clock-out tracking
- Patron Counting
- Health checkQuestionnaire
- Visitor ManagementSystem
- C3 PWT Platform (Audit/Report/Log - HIPAA Compliant)
- Door Access ControlIntegration
- Public Facing QR codeprofile
- Sanitization & Disinfecting Schedules (Real time)
- Logging, Reporting, & Auditing Capabilities
- Remote DeviceManagement
- Cloud Storage & Analytics

Why C3?

- HIPAA Compliant
- Trusted by SLED & Healthcare
- Strong IOT, AI, ML Experience
- AWS Certified (Gov Cloud)
- 24/7 Operations & Support locally in the U.S.
- Global distribution & supply chain capabilities
- Certified Reseller Ecosystem

- C3 has been deployed throughout the enterprise globally
- Secure, reliable, accurate infrastructure

CV Detection & Safety Solution (Ready Built for):

- Higher Ed, K-12, Schools
- Events Facilities
- Stadiums, Outdoor Spaces, Arenas
- Fitness centers
- Hospitals
- Commercial Build outs, Construction sites, Hotels & Resorts
- Restaurants & Cafes
- Enterprise Buildings & Offices

The system's components:

Dual thermal and video camera
Highly accurate temperature measurements
Intuitive user interface
A video/audio alerting system
Flexibly designed reports
A real-time notification system
Cloud data storage

Recurrently monitoring and measuring the temperature at specific time intervals
Analyzing multiple subjects simultaneously
Processing data in real-time
Alerting and notification systems
Automatically detecting a person with fever and sending immediate alerts
Delivering advanced notifications with an attached person's photo, temperature measurements, the location of the spotted person
Enlisting further actions to provide timely medical care
Providing daily/weekly/monthly reports across the requested parameters

C3 Mass Scanner Bullet points:

Quick, Accurate Scans Of Individuals Or Groups Of Up To 30. Automatic, Discreet Alerts. Plan A Smarter, Safer Return To The Workplace. Insight Detection & Prevention Solutions. IT Consultants Available to discuss architecture and design.

Hybrid Thermal ePoE Network Bullet Camera

256 x 192 Thermal Sensor and a 2MP CMOS Sensor

The Hybrid Thermal Network camera combine an uncooled VOx 256 x 192 thermal sensors with a 2 MP visible-light sensor for cost-effective, long-range surveillance in a rugged all-in-one package. The thermal imager coupled with an a thermalized, focus-free lens produces crisp images in total darkness and sees through rain, fog, and snow. The visible sensor with an IR illuminator delivers superior video in any lighting condition. Scans 15 and 30 people plus within (1-2 secs options).

Model Number: DH-TPC-BF3221-T

Series: 2MP, Alarm Support, Bullet, ePoE, Fixed Lens, IP67, Network Cameras, SD Card Slot, Thermal

C3 Scoping questions

- What type of facility is it?
- How many entrances do they have?
- What type of entrance? Large open entrance/multiple bay doors/single door?
- How many people/guest are typically entering at one time?
- What are they looking to capture? Temp/Mask/Facial Recog?
- Are they looking to capture guest & employees? Is there an employee entrance?
- Where are the elevated temp folks going to go once they have been tested?
- Next step? Will there be staff in PPE gear doing a secondary test using a 501K Approved Hand held device?
- Will they be trying tie into an access control or visitor management system?
- Will they require tying into a VMS (Video Management System)? If so, may have to look some other options.
- How do they want/need to the traffic to flow? Completely dependent upon customer/site and their requirements
